

H1100 and GP50 screen chart

	1/8	3/16	1/4	3/8	1/2	5/8	3/4	1	1-1/2	2	3	4	5	6	7	8	Dummy
Corn																	
% moisture																	
13%-18%		2															
18%-22%		1	1														
22%-25%		?	1	1													
25%-30%			1	1	?												
30% plus				1	1	?											
<p>This is a starting point only. Corn variety, size, and hardness can require stepping up (or down) a size. High moisture in early fall corn may require different screens than high moisture in late fall corn (example after a rainy spell)</p>																	
Hay																	
dry											1	1					
high moisture																	2
Bedding											1	1
